22CBS307	TRANSFORM CALCULUS AND PARTIAL DIFFERENTIAL EQUATIONS *(Common to Civil and IBT Branches)*	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
NIL	BS	3	1	0	4

Course Objectives	To be familiar with Fourier Series. To gain the knowledge of solving Boundary value problems. To be familiar with Laplace and Inverse Laplace transforms to solve ordinary differential equations.To acquire knowledge on Fourier transforms.To be familiar with Z-transform to solve difference equations.

UNIT – I	**FOURIER SERIES**	**9 Periods**

Dirichlet's Conditions – General Fourier series – Odd and even functions - Half range Sine and Cosine series – Root Mean Square Value- Parseval's Identity on Fourier series–Harmonic Analysis

UNIT – II	**BOUNDARY VALUE PROBLEMS**	**9 Periods**

Classification of PDE – Method of separation of variables - Fourier series solutions of one dimensional wave equation – One dimensional equation of heat conduction – Steady state solution of two dimensional equation of heat conduction (Infinite Stripes in cartesian coordinates only).

UNIT – III	**LAPLACE TRANSFORMS**	**9 Periods**

Laplace transform – Sufficient condition for existence – Transform of elementary functions – Basic properties – Transforms of derivatives and integrals of functions - Derivatives and integrals of transforms - Transforms of unit step function and impulse functions – Transform of periodic functions. Inverse Laplace transforms - Statement of Convolution theorem – Initial and final value theorems – Solution of linear ordinary differential equation of second order with constant coefficients using Laplace transformation techniques.

UNIT – IV	**FOURIER TRANSFORMS**	**9 Periods**

Statement of Fourier integral Theorem – Fourier transform pair–Fourier Sine and Cosine Transforms – Properties – Transforms of Simple functions – Convolution Theorem – Parseval's Identity.

UNIT – V	**Z TRANSFORMS**	**9 Periods**

Z-transforms - Elementary properties –Convergence of Z-transforms - Initial and Final value theorems - Inverse Z-transform using partial fraction and convolution theorem– Formation of difference equations - Solution to difference equations of second order with constant coefficients using Z- transform

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Express the periodic functions arising in the study of engineering problems as sine and cosine series.	K3
CO2	Solve the Partial Differential Equations arising in engineering problems like Wave, Heat flow and Laplace equation in steady state (Cartesian coordinates) using Fourier series.	K3
CO3	Apply Laplace transform technique to solve the given integral equations and ordinary differential equations.	K3
CO4	Find Fourier Transforms, infinite Fourier Sine and Cosine transforms.	K3
CO5	Apply Z - transform technique to solve difference equations	K3

22CES307	MECHANICS OF FLUIDS	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
NIL	ES	3	0	0	3

Course Objectives	To impart the knowledge on properties and behavior of fluid at static and dynamic conditions to solve various fluid flow problems.

UNIT – I	BASICCONCEPTS ANDFLUIDSTATICS	9 Periods

Properties of fluids- Density, specific gravity, viscosity, surface tension, capillarity, compressibility, bulk modulus. Fluid statics – Pascal's Law - Pressure measurement – Manometers. Hydrostatic forces on plane and curved surfaces –Stability of floating bodies – Buoyancy–Metacentre and metacentric height-simple problems.

UNIT – II	PRINCIPLES OF MASS	9 Periods

Eulerian Vs.Lagrangian descriptions – Classification of fluid flow – Stream line, path line and streakline – Continuity equation – Velocity – Acceleration of a fluid particle - tangential, normal, local and convective acceleration-Velocity potential and stream functions – Free and Forced vortex flow.

UNIT – III	PRINCIPLE OF ENERGY	9 Periods

Energy and its forms, Energy equation – Euler's and Bernoulli's equation – Applications - Venturimeter, Orificemeter and Pitot tube - Flow over Notches and Weirs.

UNIT – IV	FLOW THROUGH CONDUITS	9 Periods

Laminar flow in pipes and between parallel plates - Hagen Poiseuille equation for flow through circular pipes - Turbulent flow – Reynolds experiment –Frictional loss in pipe- Darcy – Weisbach equation - Hydro dynamically smooth and rough boundaries, velocity distributions for turbulent flow in smooth and rough pipes.

UNIT – V	BOUNDARY LAYER AND FLOW AROUND IMMERSED BODIES	9 Periods

Boundary layer - Definition – Boundary layer thickness - Displacement, energy and momentum thickness - Boundary layer separation - Flow around immersed objects – Drag and lift on immersed bodies – Magnus effect.

4	*M.K.Natarajan"**Principles of Fluid Mechanics**", Anuradha Agencies, Vidayal Karuppur, Kumbakonam, 2008*

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Identify the properties of fluids and fluid statics	K2
CO2	Apply the continuity equation for solving fluid flow problems.	K3
CO3	Apply the principles of Euler's equation and Bernoulli's equation in real situation of fluid problems	K3
CO4	Examine the fluid flow behavior for laminar and turbulent flows.	K3
CO5	Analyze the boundary layer separation drag and lift on immersed bodies.	K3

22CES308	ENGINEERING GEOLOGY					SEMESTER III
PREREQUISITES		**CATEGORY**	**L**	**T**	**P**	**C**
NIL		**ES**	**3**	**0**	**0**	**3**
Course Objectives	This course will familiarize the students on the role and importance of geology in civil engineering, apart from learning the methods of surface and subsurface investigations using geological, geophysical and remote sensing methods.					
UNIT – I	**INTRODUCTION AND GEOMORPHOLOGY**					**9 Periods**
Interrelationship between Geology and civil engineering – Branches of Geology – Earth Structure and composition –Concept of Plate tectonics, Geological processes, agents and kinds – Weathering, wind, rivers and their Engineering significance - Volcano – Landforms, Materials and Types of Eruptions, Ground water – Properties of rock – Geological work of ground water.						
UNIT – II	**MINERALOGY**					**9 Periods**
Physical and Chemical properties of minerals – Study of the following rock forming minerals – Quartz family, Felspar family, Biotite, Muscovite, Calcite, Magnesite, Ore minerals - Hematite, Magnetite, Bauxite, Graphite, Coal and Oil and natural gas – Clay minerals – Properties and their economic uses.						
UNIT – III	**PETROLOGY AND GEOTECHNICAL PROPERTIES OF ROCKS**					**9 Periods**
Formation of Igneous rocks, Sedimentary rocks and Metamorphic rocks, Texture and Structure, Classification and Engineering properties of Granite, Pegmatite, Dolerite and Basalt., formation and Engineering properties of Sandstone, Limestone and Shale. Agents, kinds and Engineering properties of metamorphic rocks - Quartzite, Marble, Slate, Gneiss and schist. Influence on strength of rocks. Rock Mass Rating (RMR), Rock Quality Designation (RQD), Geological Strength Index (GSI).						
UNIT – IV	**STRUCTURAL GEOLOGY & ELEMENTS OF SEISMOLOGY**					**9 Periods**
Attitude of beds Dip and Strike - Uses of Clinometer compass – Outcrops – Geological maps – their uses – Structural features – Folds, Faults and Joints – their engineering significance. - Earthquakes – Causes and effects, Seismic waves and seismographs, Elastic rebound theory, Mercelli's scale of intensity, Magnitude - Richter's scale and Earthquake Zones in India -Engineering Considerations.						
UNIT – V	**GEOLOGICAL INVESTIGATIONS FOR ENGINEERING STRUCTURES AND GEOHAZARDS**					**9 Periods**
Geological investigations pertaining to the constructions of Dam and Reservoir, Tunnels and Road cuttings, Geophysical investigations - Seismic and electrical resistivity methods and data interpretation. Landslides – causes and prevention – Sea erosion and coastal protection, Tsunami – causes and mitigation. Case studies from India.						
Contact Periods: **Lecture: 45 Period Tutorial: 0 Period Practical: 0 Period Total: 45 Periods**

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Know the internal structure of earth and its relation to volcanism and the various geological agents.	K2
CO2	Identify the properties and uses of Minerals.	K1
CO3	Identify the formation and Engineering properties of rocks.	K2
CO4	Apply fundamental knowledge in structural geology like fault, fold and Joints	K3
CO5	Use all the geological knowledge in design and construction of major civil engineering structures, in addition to mitigating geological hazards such as earthquakes, landslides and Tsunami that affect civil engineering structures.	K2

22CPC301	MECHANICS OF SOLIDS I	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
ENGINEERING MECHANICS	PC	3	0	0	3

Course Objectives	To understand the concepts and the behavior of Engineering materials under the action of axial, bending and twisting forces in order to evaluate the strength of the materials.

UNIT – I	**STRESS, STRAIN AND DEFORMATION OF SOLIDS**	**9 Periods**

Introduction – Mechanical properties of materials – Hooke's law – Stress Strain Diagram for Mild Steel, TOR Steel, Concrete – Principle of superposition - Deformation of simple, compound bars and bars of Varying sections – Elastic constants - Volumetric strains – Thermal Stresses and Strains - Strain Energy due to Axial Force – Resilience – Stresses due to Impact and Suddenly Applied Load. Stresses and deformation in thin cylindricalshell due to internal pressure.

UNIT – II	**SHEAR FORCE AND BENDING MOMENT IN BEAMS**	**9 Periods**

Beams and Bending – supports and loads - Shear Force and Bending Moment Diagrams for determinate beams – Relationship between Rate of Loading, Shear Force, Bending Moment – Point of Contra Flexure.

UNIT – III	**BENDING AND SHEAR STRESSES IN BEAMS**	**9 Periods**

Theory of Simple Bending – Analysis of Beams for Stresses - Stress Distribution at a Cross Section due to Bending Moment and Shear Force for determinate beams - Flitched Beams – Combined Direct and Bending Stresses – Condition for No Tension in a section – Strain Energy due to Flexure, Transverse Shear – Shear Stress Distribution.

UNIT – IV	**TORSION**	**9 Periods**

Theory of Torsion – Stresses and Deformations in Solid and Hollow Circular Shafts – Strain Energy due to Torsion – Combined bending moment and torsion of shafts - Power transmitted to shaft – Shaft in series and parallel – Closed and Open Coiled helical springs – Leaf Springs – springs in series and parallel.

UNIT – V	**COMPLEX STRESSES AND TRUSS**	**9 Periods**

State of Stress in two dimensions – Stresses on inclined planes – Principal Stresses and Principal Planes – Maximum shear stress–Principal Strains and Direction – Mohr's circle method.

Analysis of pin jointed plane determinate trusses by method of joints and method of sections – Analysis of space truss by tension coefficient method.

22CPC302	CONSTRUCTION MATERIALS AND TECHNOLOGY		SEMESTER III			
PREREQUISITES		**CATEGORY**	**L**	**T**	**P**	**C**
NIL		**PC**	**2**	**0**	**2**	**3**
Course Objectives	To learn the properties, applications and testing procedures of construction materials and the construction practices for different types of structural elements.					
UNIT – I	**CONSTRUCTION MATERIALS**					**6 periods**
Properties, composition, types &tests: Stones – Bricks – Timber – Wood products – Glass - Polymer products.						
UNIT – II	**MASONRY AND PLASTERING**					**6 periods**
Stone masonry – Brick masonry -– Composite masonry– Types of wall - Lintels. Plastering–Materials and Methods of plastering–Types of plastering - Defects in plastering–pointing.						
UNIT – III	**FLOORING AND ROOFING**					**6 periods**
Floors– Floor finishing materials – Classifications – Terrazzo flooring – Cement concrete flooring – Damp Proof Course– Causes and effect of dampness – Materials and Methods of damp proofing – Anti-termite treatment. Roofs– Roofing materials –Types – Pitched roof –Flat roof – Flat and Ribbed slab. Ramps and Escalators.						
UNIT – IV	**DOORS,WINDOWS AND PAINTING**					**6 periods**
Doors and Windows– Types – Fixtures and Fastening – Ventilators. Painting – Classification of paints – Painting on new and old surfaces of steel, timber and masonry wall.						
UNIT – V	**CONSTRUCTION PRACTICES**					**6 periods**
Centering and shuttering – Formwork – Scaffolding – Plumbing Services. Erection of steel trusses – Frames – Launching girders – Automation in construction.						

LIST OF EXCERCISES **30 periods**

1. Identification and classification of stone materials.
2. Crushing and water absorption test on stone as per Indian code.
3. Compression test on hollow block.
4. Hands on practice for arrangement of different brick masonry bonds (Demonstration for practice and drawing for exam)
5. Hand's on practice on plastering works.
6. Collection of different flooring material from the field / laying of floor tiles.
7. a) Different types of roof & application – case study
   b) Study on the types of roof selection and its material for different applications.
8. Identification and classification the different types of doors and window in the campus, discussing its feature.
9. Classification of paints & utilization as per current market (inner & outer).
10. a) Observation and plot the existing plumbing service inside the campus.
    b) Study on the different plumbing services and its appliances.
11. Case study on recent technologies used in construction.

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Select the suitable materials for building construction	K2
CO2	Outline the different types of masonry and plastering works.	K2
CO3	Select the suitable type of floors, roofs, stairs and dampness preventing methods for practical applications.	K2
CO4	Apply knowledge to select suitable doors, windows and paints for buildings.	K2
CO5	Summarize the different construction practices existing in construction field.	K2

22CPC303	SURVEYING	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
NIL	PC	3	0	0	3

Course Objectives	To understand the basic principle and concepts of different surveying methods to calculate various measurements using survey instruments.

UNIT – I	INTRODUCTION, CHAIN SURVEYING AND COMPASS SURVEYING	9 Periods

Definition- Principles - Classification – Field and Office work – Scales – Conventional Signs.

Chain Survey - Instruments – Ranging – Types - Obstacles in Chaining – Chain and Tape corrections –Setting out Perpendiculars.

Prismatic Compass – Surveyor's Compass – Working and use of compass - Bearing – Systems and Conversions – Computation of angles from bearing - Local Attraction - Magnetic Declination – Dip – Traversing – Adjustment of error.

UNIT – II	LEVELLING AND CONTOURING	9 Periods

Basic Terms - Types of Level – Fundamental Axes - Levelling staff – Bench Marks – Temporary and Permanent Adjustments – Types of Levelling - Curvature and Refraction correction – Reciprocal Levelling – Calculation of Areas and Volumes.

Contouring – Characteristics and Uses of Contours – Methods of contouring.

UNIT – III	THEODOLITE SURVEYING AND TACHEOMETRIC SURVEYING	9 Periods

Theodolite – types – Terms - Temporary and Permanent Adjustments – Measurement of Horizontal Angles by Repetition and Reiteration – Closing Error and Distribution – Omitted measurements. Tacheometric surveying –- Stadia method - fixed hair method - Determination of constants of the tacheometer - use of anallactic lens - distance and elevation formula for inclined sights with vertical and normal holding staff – movable hair method - Tangential method - subtense bar method.

UNIT – IV	CURVES AND HYDROGRAPHIC SURVEYING	9 Periods

Simple curves – elements - Setting out of curves - Linear and angular methods - Compound and Reverse curves - elements.

Shore line survey–Sounding–Equipments–Locating Sounding-Reduction.

UNIT – V	TRIANGULATION AND MODERN SURVEYING INSTRUMENTS	9 Periods

Vertical and horizontal control - Triangulation-classification – Intervisibility - Triangulation Figures – Strength of figure -Signals and Towers - Base line measurements - Satellite stations and reduction to centre.

Trigonometrical Levelling - Geodetical observations - Curvature correction - Refraction correction – Axis signal correction – Difference in elevation.

Total Station – Principle – classification - working. Applications of Drone Surveying.

GPS - Developments – Basic Concepts – Segments – Applications.

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Calculate linear and angular measurements using compass and chain.	K2
CO2	Interpret level data using different types of levelling techniques and plot contour map by various contouring methods.	K2
CO3	Determine the horizontal distances, vertical distances and area by using theodolite and tacheometer.	K3
CO4	Set out the curves using survey instruments and apply the principles of hydrographic surveying.	K3
CO5	Execute triangulation method, Trigonometric levelling and apply modern surveying principles and techniques.	K2

22CES309	MATERIALS TESTING LABORATORY	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
NIL	ES	0	0	3	1.5

Course Objectives	To deal with experimental determination and evaluation of mechanical characteristics and behaviour of construction materials and to familiarize experimental procedures and common measurement instruments, equipment and devices.

LIST OF EXPERIMENTS

1. Mechanical properties of mild steel rod as per IS Code 1608 (2005)
2. Mechanical properties of tor steel rod as per IS Code 1786 (2008)
3. Weight per running metre of steel rod
4. Tension and compression test on springs.
5. Test on Bricks: Visual observation, Compression test, Water absorption test and Efflorescence test as per IS 3495-1 to 4 (1992)
6. Hardness test on different metals.
7. Deflection test on simply supported beams (for different metals).
8. Deflection test on cantilever beams (for different metals).
9. Bending test on rolled steel joist
10. Flexure test on tiles
11. Charpy and Izod Impact Test
12. Compression test on Hallow/Concrete Blocks

Contact Periods:

Lecture: 0 Periods Tutorial: 0 Periods Practical: 45 Periods Total: 45 Periods

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Determinethetensilestrength ofmaterials	K3
CO2	Obtain bending properties of structural materials	K3
CO3	Determinethehardness propertiesofthematerials	K3
CO4	Predict the compressive strength of the materials	K3
CO5	Obtaintheimpact andtorsionalstrengthofthematerials	K3

22CPC304	SURVEY LABORATORY	SEMESTER III

PREREQUISITES	CATEGORY	L	T	P	C
NIL	PC	0	0	3	1.5

Course Objectives	To deal with different surveying methods and measure the distances, areas using different surveying instruments and also to enable setting out of foundation and curves.

LIST OF EXPERIMENTS

1. Chain Surveying – Open and Closed Traversing
2. Compass Surveying – Intersection method
3. Compass Surveying - Traversing
4. Plane table surveying –Introduction- Intersection method
5. Levelling –Differential Levelling and Fly Levelling
6. Measurement of horizontal angles by Repetition and Reiteration methods.
7. Height and Distance – Single Plane method and Double Plane method.
8. Tacheometric Surveying – Stadia, Tangential method and Subtense bar method
9. Total Station Surveying.
10. Setting out of foundation and Curves

Contact Periods:

Lecture: 0 Periods Tutorial: 0 Periods Practical: 45 Periods Total: 45 Periods

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Effectively handle the surveying instruments like Chain, Compass, plane table, Dumpy level and Theodolite.	K3
CO2	Accurately measure distances, areas, angles and levels using survey instruments.	K3
CO3	Calculate the levels and distances in the field for various works.	K3
CO4	Setout foundations and curves for various Civil Engineering projects.	K3
CO5	Handle and measure using advanced surveying instruments like Total Station.	K3

22CES410	APPLIED HYDRAULICS AND FLUIDMACHINERY	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
MECHANICS OF FLUIDS	ES	3	0	0	3

Course Objectives	To understand the performance of pumps and turbines, open channel hydraulics with different types of flow, dimensional analysis and impulse momentum principle for the performance of hydraulics machines.

UNIT – I	**OPENCHANNELFLOW**	**9 Periods**

Uniform flow - Velocity measurement - Manning's and Chezy's formula – Roughness coefficients - Critical depth and critical velocity - Most economical sections - Wide open channel - Specific energy curve - Critical flow - Dynamic equations of gradually varied flow - Assumptions - Characteristics of flow profiles - Draw down and back water curves - Hydraulic jump - Types – Energy dissipation

UNIT – II	**DIMENSIONALANALYSIS**	**9 Periods**

Units and Dimensions – Dimensional Homogeneity -Rayleigh's and Buckingham methods – Non-dimensional numbers – Model study and Similitude–scale effects and distorted model – Applications of models study.

UNIT – III	**MOMENTUMPRINCIPLE**	**9 Periods**

Impulse momentum Principle and equation - Impact of Jet – force exerted by a jet on normal, inclined and curved surfaces for stationary and moving vanes- Angular momentum principle - Inlet and outlet velocity triangles – Applications of impulse momentum principle.

UNIT – IV	**TURBINES**	**9 Periods**

Turbines – Classification – Impulse and Reaction Turbines – Tangential flow, radial flow and axial flow turbines-work done and efficiency - draft tube and cavitation - Selection of Turbines-operating characteristic curves of turbines- Specific speed- Runaway Speed.

UNIT – V	**PUMPS**	**9 Periods**

Pumps– Classifications of pumps –Centrifugal pump –Work done and Efficiency – Priming - Net positive Suction Head - Cavitation in Pumps - multistage Pumps. Reciprocating pump -Work done and Efficiency - negative slip - air vessels - indicator diagram–Working of Jet Pump and submersible pump.

22CPC405	MECHANICS OF SOLIDS II	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
MECHANICS OF SOLIDS I	PC	3	0	0	3

Course Objectives	To study the different methods used for beam deflection analysis, analysis of Indeterminate beams, unsymmetrical bending, columns, theory of elastic failures and stress in thick cylinders.

UNIT – I	DEFLECTION OF BEAMS	9 Periods

Differential Equation for elastic curve – Double Integration Method – Macaulay's Method – Moment Area Method – Conjugate Beam Method – Stepped beams

UNIT – II	STATICALLY INDETERMINATE BEAMS	9 Periods

Propped Cantilever Beams – Fixed Beams – Method of Consistent Deformation – Continuous Beams – Theorem of Three Moments – Calculation of reactions, Bending Moments and Shear Force – Shear Force and Bending Moment Diagrams (for all Types of Loadings, Couple).

UNIT – III	INDETERMINATE TRUSSES AND COLUMNS	9 Periods

Analysis of Plane trusses with maximum two redundant members – Trusses with lack of fit – Temperature effects. Members Subjected to Axial Load – eccentric load – Slenderness Ratio – End Conditions – Buckling Load for Columns - Euler's Theory – Assumptions and Limitations – Rankine - Gordon Formula – Empirical Formula – Straight Line Formula – Columns Subjected to Eccentric Loading .

UNIT – IV	UNSYMMETRICAL BENDING AND SHEAR CENTRE	9 Periods

Stresses due to Unsymmetrical Bending of Beams for Symmetrical Sections – Moment of Inertia – Product of Inertia – Principal Moment of Inertia - Shear Centre - Definition – Shear Centre for Sections Symmetrical about One Axis

UNIT – V	THICK CYLINDERS AND THEORIES OF ELASTIC FAILURE	9 Periods

Lame's Equation – Hoop Stress and Radial Stress Distribution – Compound Cylinders – Wire Wound Cylinders – Shrink Fit.

Theories of Elastic Failure – Factor of Safety – Graphical Representation of Theories for Two Dimensional Stress System.

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	To impart knowledge on deflection of beams in various situations using different methods.	K3
CO2	To identify the behaviour of statically indeterminate beams	K3
CO3	To recognize the behaviour of columns with different end conditions.	K3
CO4	To develop and understand the concepts of unsymmetrical bending of beams and shear centre.	K3
CO5	To understand the theory thick cylinders and the theory of elastic failures.	K3

22CPC406	CONCRETE TECHNOLOGY				SEMESTER IV
PREREQUISITES		**CATEGORY**	**L**	**T**	**P**	**C**
CONSTRUCTION MATERIALS AND TECHNOLOGY		**PC**	**3**	**0**	**0**	**3**
Course Objectives	To understand about various concrete making materials, the properties of fresh and hardened concrete, special concrete and mixdesignforconcrete.					

UNIT – I	**INGREDIENTS OF CONCRETE**	**9 periods**

Cement – constituents - Hydration – Tests on cement – Types of cement – Aggregates – properties and uses – Classification of aggregates – Properties and test on aggregates – gradation – Quality of water – Admixtures – Chemical Admixtures and mineral admixtures.

UNIT – II	**CONCRETING OPERATIONS**	**9 periods**

Concreting operations: Batching, mixing, transportation, placing, compaction, curing and finishing of concrete. Forms for Concreting: Different types of formworks for beams, slabs, columns, material used for formwork, requirement of good form work. Stripping time for removal of formworks as per IS456 – 2000 provision for different structural members. Water Proofing: Importance and need of water proofing. Methods of water proofing and materials used for water proofing. Joints in Concrete Construction: Types of joints, joining old and new concrete. Methods of joining, materials used for filling joints.

UNIT – III	**PROPERTIES OF CONCRETE**	**9 periods**

Properties of fresh concrete – Workability – Segregation – Bleeding – Test for fresh concrete properties – Properties of hardened concrete – Strength – Stress – Strain characteristics – Modulus of Elasticity – Shrinkage – Creep – Thermal properties – Permeability – Test for hardened concrete properties – Introduction to micro structural properties of concrete - Non-Destructive Test.

UNIT – IV	**MIX DESIGN AND QUALITYCONTROLOFCONCRETE**	**9 periods**

Quality Control - Frequency of sampling – Statistical analysis of test results – standard deviation – Coefficient of variation – Characteristic strength – Acceptance and rejection Criteria – Importance ofwater cement ratio – Importance of cover to concrete. Nominal mixes – Design Mixes – factors influencing the design mix – Mix Design by ACI method, ARE method and DOE method.

UNIT – V	**SPECIALCONCRETES AND CONCRETING METHODS**	**9 periods**

High Performance Concrete – Lightweight Concrete – Self Compacting Concrete – Polymer Concrete – Fibre Reinforced Concrete - 3D printing of concrete.

Special Concreting Methods: Pumped Concrete, Ready mix Concrete, Under-water Concrete, Hot and Cold weather Concreting, Precast Concrete, Pre-placed Concrete.

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Identify the properties and role of ingredients like cement, aggregate, admixtures in concrete.	K2
CO2	Choose the suitable formwork and methods of concrete production for construction.	K2
CO3	Infer the behavior of fresh and hardened concrete.	K2
CO4	Proportion the concrete using various mix design concepts.	K2
CO5	Select appropriate type of concrete for specific requirements.	K2

22CPC407	DESIGN OF REINFORCED CONCRETE ELEMENTS	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
MECHANICS OF SOLIDS I	PC	3	0	0	3

Course Objectives	Understand the behavior and design of reinforced concrete components and systems subjected to gravity loads according to INDIAN STANDARD building code requirements.

UNIT – I	**REINFORCEDCONCRETEMATERIALS**	**9 Periods**

Introduction to R.C structures – Review of basic material properties - Concrete and Reinforcing steel - Objectives of structural Design- Stages in RCC structural design process for a building- Types of load on structures and load combinations –Load transfer in framed structures - Design philosophies – Basic design concepts –working stress, ultimate load and limit state methods – Analysis: Moment of resistance for Rectangular beams.

UNIT – II	**LIMIT STATE DESIGN OF BEAMS**	**9 Periods**

Design of singly and doubly reinforced rectangular and flanged beams - Design of beams for bending, shear and torsion - bond and anchorage – deflection.

UNIT – III	**LIMIT STATE DESIGN OF SLABS& STAIRS**	**9 Periods**

Behaviour of one way and two way slabs – Design and detailing of one way and two way rectangular slabs subjected to uniformly distributed load - Design of lintel - lintel cum sunshade – Stairs - Loads on Staircase – Design of Dog legged staircase.

UNIT – IV	**LIMIT STATE DESIGN OF COLUMNS**	**9 Periods**

Classification of columns - Axial, uniaxial and biaxial bending - Braced and unbraced columns - Orientation of columns in buildings - Design of columns – Use of interaction charts.

UNIT – V	**LIMIT STATE DESIGN OF FOOTINGS**	**9 Periods**

Behaviour of concentric and eccentric footing - Design of axially loaded square and rectangular pad and sloped isolated footing – Design of wall footing.

22CPC408	WATER SUPPLY ENGINEERING		SEMESTER IV			
PREREQUISITES		**CATEGORY**	**L**	**T**	**P**	**C**
NIL		**PC**	**3**	**0**	**0**	**3**
Course Objectives	To conversant with sources of water, demand of water, characteristics of water and Conveyance of Water.To expose the students to understand the design of water Treatment processes and distribution of water supply					
UNIT – I	**QUANTITY OF WATER AND SOURCES OF WATER**					**9 Periods**
Introduction of Public water supply system – Planning, Objectives, Design period, Population forecasting; Water demand – Sources of water and their characteristics, Surface and Groundwater –Impounding Reservoir – Development and selection of source – Source Water quality.						
UNIT – II	**QUALITY OF WATER AND TRANSPORTATION**					**9 Periods**
Quality of water - sampling - Characterization – Significance -analysis of water - water borne diseases - quality standards of water as per IS 10500. Intakes - types - intake tower - Transportation of water - types of conduits - Hydraulics of pipe flow - design - materials of pressure pipes - pipe corrosion - Theories, effect and prevention- Laying, jointing and testing of pipe lines. Pumps - Types of pumps - pumping stations.						
UNIT – III	**WATER TREATMENT**					**9 Periods**
Objectives – Unit operations and processes – Principles, functions, and design of water treatment plant units, aerators, flash mixers, Coagulation and flocculation – Clarifloccuator - Plate and tube settlers - Pulsator clarifier – Rapid and slow sand filters - Disinfection - Residue Management –Construction, Operation and Maintenance of treatment units- Recent advances.						
UNIT – IV	**ADVANCED WATER TREATMENT**					**9 Periods**
Water softening - Desalination - R.O. Plant - demineralization – Adsorption - Ion exchange - Membrane Systems - RO Reject Management - Iron and Manganese removal –Fluoridation and Defluoridation - Construction , Operation and Maintenance of treatment units – Recent advances.						
UNIT – V	**WATER DISTRIBUTION SYSTEM**					**9 Periods**
Distribution of water - requirements of good distribution system - method of distribution system - layouts of distribution system - Requirements of water distribution – Components – Selection of pipe material – Service reservoirs – Functions – Network design – Analysis of distribution networks - Computer applications – Appurtenances – Leak detection. Principles of design of water supply in buildings – House service connection – Fixtures and fittings, systems of plumbing and types of plumbing.						
Contact Periods: **Lecture: 45 Periods Tutorial: 0 Periods Practical: 0 Periods Total: 45 Periods**						

TEXT BOOKS:

1	*Garg. S. K., "**Water Supply Engineering**", Khanna Publishers, Delhi, 2014.*
2	*Punmia B.C, Jain A.K and Jain A.K, "**Water Supply Engineering**" Laxmi Publications, New Delhi 2014.*

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Know the principles of water supply and characteristics of water.	K1, K2
CO2	Attain knowledge on quality of water and its conveyance.	K1, K2
CO3	Acquire knowledge on various water treatment units.	K1, K2
CO4	Get clear knowledge about advanced water treatments	K1, K2
CO5	Know the distribution and supply of water	K1, K2

22CMC4Z2	CONSTITUTION OF INDIA (Common to all Branches)		SEMESTER IV			
PREREQUISITES		**CATEGORY**	**L**	**T**	**P**	**C**
NIL		**MC**	**3**	**0**	**0**	**0**
Course Objectives	The objective of the course is to familiarize the students on the role, powers and functions of Indian government. Also understand the recent acts in India.					
UNIT- I	**INTRODUCTION ANDEMERGENCY PROVISIONS**		**9 Periods**			
Historical Background: The Company rule, The Crown rule - Constituent Assembly: Composition, Objectives - Preamble and Salient features of the Indian Constitution - Fundamental Rights, Fundamental Duties, Directive Principles of state policy, Emergency Provisions - National Emergency, President Rule, Financial Emergency.						
UNIT- II	**SYSTEM OF GOVERNMENT**		**9 Periods**			
Parliamentary system: merits, demerits, reasons for adopting parliamentary system – Federal system: Evaluation of federal features –Centre-State relations: Legislative, Administrative and Financial relations – Local Government: Panchayati Raj and urban local government.						
UNIT- III	**UNION AND STATE GOVERNMENT**		**9 Periods**			
President of India: Election, Powers and functions - Prime Minister and Cabinet: Structure and functions – Governor: Powers and functions - Chief Minister and Council of Ministers: Functions.						
UNIT- IV	**ORGANS OF GOVERNANCE AND RECENT ACTS**		**9 Periods**			
Parliament: LokSabha and RajyaSabha, Composition and powers - State Legislative Assembly and Legislative Council: Composition and powers - Judicial System in India: Structure and features - Supreme Court and High Court: Composition, Jurisdiction, Recent acts in significance-RTI, Citizenship act, POCSO Act.						
UNIT- V	**POLITICAL DYNAMICS**		**9 Periods**			
Political parties: Party system, Recognition of National and State parties – Elections: Electoral system and reforms – Pressure groups – National Integration: Obstacles, National Integration Council – Foreign Policy: Principles and Objectives.						
Contact Periods: **Lecture: 45 Period Tutorial: 0 Period Practical: 0 Period Total: 45 Periods**						

TEXT BOOKS:

1	*National portal of India, "**The Constitution of India"** (Full Text), https://legislative.gov.in/constitution-of-india*
2	*Dr.B.R.Ambedkar, "**The Constitution of India",** Sudhir Prakashan, 2020.*

REFERENCES:

1	*Durga Das Basu, "**Introduction to the Constitution of India**, LexisNexis, 2022*
2	*P.M.Bakshi, "**The Constitution of India"**, LexisNexis, 2020*
3	*Subash C Kashyap, "**Our Parliament"**, National Book Trust, 2021*
4	*Subash C Kashyap, "**Our Political System**", National Book Trust, 2011*

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Know the evolution of Indian Constitution and its basic premises.	K1
CO2	Explain the system of governance in India.	K2
CO3	Describe the structure of Union and State Governments	K2
CO4	Obtain the knowledgeof functions of Legislature and Judiciary	K1
CO5	Know the political system of India	K1

22CES411	FLUID MECHANICS AND MACHINERY LABORATORY	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
22CES307 - MECHANICS OF FLUIDS	ES	0	0	3	1.5

Course Objectives	* To impart knowledge in solving problems occurring in a pipes due to losses, the verification of Bernoulli's theorem and its applications and conducting performance tests on different types of pumps and turbines.

LIST OF EXPERIMENTS:

1. Determination of Darcy's friction factor.
2. Verification of Bernoulli's Theorem.
3. Calibration of Venturimeter and Orifice meter.
4. Flow over V-Notch.
5. Flow through Mouthpiece.
6. Determination of velocity through Pitot tube.
7. Determination of Meta centric height.
8. Performance Study of Roto dynamic pumps:Centrifugal pump, Submersible pump and Jet pump.
9. Performance Study of Positive displacement pumps:Reciprocating pump, Gear oil pump and Single screw pump.
10. Load test on Pelton wheel, Francis turbine and Kaplan Turbine.

COURSE OUTCOMES: On completion of the course, the students will be able to:		**Bloom's Taxonomy Mapped**
CO1	Obtain the knowledge on conducting different type of experiments.	K2
CO2	Solve different problems in pipes due to losses.	K3
CO3	Verify the Bernoulli's theorem and its applications.	K3
CO4	Do performance tests on different types of pumps.	K3
CO5	Do performance tests on different types of turbines.	K3

22CES412	ENGINEERINGEXPLORATION FOR CIVIL ENGINEERING	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
NIL	ES	0	0	3	1.5

Course Objectives	The objective of the course is to provide an introduction to the engineering field. It is designed to help the student to learn about engineering and how it is useful in our everyday life.	
UNIT- I	**INTRODUCTION**	**(15)**
Introduction to Engineering and Engineering study : Difference between science and engineering, scientist and engineer needs and wants, various disciplines of engineering, some misconceptions of engineering, expectation for the 21st century engineer and Graduate Attributes.		
UNIT- II	**ENGINEERINGDESIGN**	**(15)**
Engineering Requirement, Knowledge within Engineering disciplines, Engineering advancements, Problem definition, Idea generation through brainstorming and researching, solution creation through evaluating and communicating, text/analysis, final solution and design improvement.		
UNIT- III	**ENGINEERINGDISCIPLINES**	**(15)**
Civil Engineering: Loads on Structures, Analysis of Structural elements, Design and detailing of Structural elements. Testing and selection of construction materials. Analysis of water quality and checking its suitability for construction and drinking purposes. Preparation of site layout using advanced Survey instruments. Modeling of Hydraulic elements.		

Contact Periods:
Lecture : 0 Period **Tutorial : 0 Period** **Practical : 45 Periods** **Total: 45 Periods**

COURSEOUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Explain technological and engineering development, change and impacts of engineering.	K2
CO2	Complete initial steps (Define a problem list criteria and constrains, Brainstorm Potential solutions and document ideas) in engineering designs.	K3
CO3	Communicate possible solutions through drawings and prepare project report.	K3
CO4	Draw sketches to a Design problem.	K3
CO5	Apply the concept of engineering fundamentals in Civil, Mechanical, Electrical and Computer Engineering.	K3

22CPC409	ENVIRONMENTAL ENGINEERING LABORATORY	SEMESTER IV

PREREQUISITES	CATEGORY	L	T	P	C
NIL	PC	0	0	3	1.5

Course Objectives	To Impart knowledge in sampling and analysis of procedures of water and waste water samples to identify the water and waste water characteristics.

LIST OF EXPERIMENTS

1. Sampling and preservation methods for water and wastewater (Demonstration only).
2. Determination of pH & Electrical Conductivity.
3. Determination of Turbidity.
4. Determination of Chlorides.
5. a) Determination of Total Hardness.
   b) Determination of Calcium Hardness.
6. a) Determination of Alkalinity.
   b) Determination of Acidity.
7. Determination of Sulphates.
8. Determination of Iron & Fluoride.
9. Estimation of Residual Chlorine.
10. Estimation of Solids.
    a) Determination of Total Suspended solids.
    b) Determination of Dissolved solids.
    c) Determination of Fixed and Volatile solids.
    d) Determination of Total solids.
11. Determination of Optimum Coagulant Dosage.
12. Determination of Dissolved Oxygen.
13. Determination of BOD.
14. Determination of COD.
15. Demonstrations of water quality parameters for construction purpose.

Contact Periods:
Lecture: 0 Periods Tutorial: 0 Periods Practical: 45 Periods Total: 45 Periods

COURSE OUTCOMES: On completion of the course, the students will be able to:		Bloom's Taxonomy Mapped
CO1	Interpret thesamplingandpreservation methodsofwaterandwastewater	K2
CO2	Correlate the physical properties of water and waste water.	K3
CO3	Correlate the chemical properties of water and waste water.	K3
CO4	Categorize thebiologicalproperties ofwaterand wastewater.	K3
CO5	Categorizethe Micro-biologicalproperties ofwaterandwastewater.	K3
