DEPARTMENT OF ELECTRONICS & INSTRUMENTATION ENGINEERING

2.3.1- Student - Centric methods

The Department practices a teaching methodology which focuses on imparting education through a student centric approach. This methodology helps to transform students from being relegated to the role of passive recipients to active and involved stakeholders, apart from boosting their confidence and encouraging independence.

Courses of the Department are defined highlighting course objectives, programme specific objectives and programme outcomes that provide a comprehensive understanding to the student right at the beginning of the course as to what should be the primary focus. It also helps them in self-evaluating their performance at the conclusion of the course. Feedback of the Course and teachers, given by students at the end of each semester provides an opportunity to identify any lacunae which can then be addressed.

Audio- Visual methodology, Language Lab, Google Classroom, Industrial Visits, Field Work and Projects are some of the means utilized by the Departments to provide experiential and participative learning.

Internal assessments are so planned so as to encourage students to work independently. Written Assignments are required to be submitted by students and these need to be done individually by researching on the given topic so as to enhance confidence, develop writing skills and hone style, apart from inculcating an interest in research activities.

Ability Enhancement, Generic and Skill Enhancement courses are offered to provide and prepare students for life. Non-CGPA courses are provided to evolve aesthetics of the students. NSS Cell and NCC sub-unit have been set-up for the students to participate, integrate and learn.

2.3.2 ICT Enabled tools

Effective content delivery by using Information and Communication Technology (ICT) tools in the class room for better understanding and reinforcement of the concepts and problem-solving is adopted by all the faculty of the department. All the classrooms and laboratories are equipped with computers with internet access. The faculty members are trained for the efficient use of tools through training sessions organized by the institute and faculty development programmes conducted by IITs and NITs. The faculty members had used Google meet or Zoom to conduct tests and for lecture delivery during lockdown. They also used many interactive methods for effective teaching such as PPT with animations, Video clippings, Use of online resources from NPTEL, Coursera, YouTube links, Simulation tools, Virtual labs, online assessment tools like Socratic, and various Cloud portals etc. ICT enabled Teaching- Learning process is supported with regular practical sessions, access to Digital Library, Online courses (MOOCs, NPTEL etc.), online journals, Online tests, use of LCD projectors, smart classrooms for seminars and workshops, productive use of educational videos, and accessibility of non-print material for students.
